PROJECTS

Memory Game | Browser Based Game

Created a memory game with HTML, CSS, and Vanilla Javascript to have users interact with a UI to play a simple matching game

RecipeBook | Recipe Finder and Creation

Recipe site that utilized Vue.js and Python with Flask. Users may explore the many recipes and their ingredients provided by the site as well as create their own to share with others

Hail | Gaming Blog

Group project built with the MERN stack with the use of Git and Github for version control.
